We expect to hold a special stockholder meeting in the second calendar quarter of 2019," said Jason Slakter, M.D., chief executive officer of Ohr Pharmaceutical. "After reviewing various strategic alternatives for our business in 2018, we identified a merger with NeuBase as the best opportunity to generate value for our stockholders, based on their ongoing work to change the paradigm for treating rare genetic diseases with next generation, highly specific antisense oligonucleotide therapies. We look forward to working with NeuBase to create a successful company focused on bringing transformative new therapies to patients around the world suffering from rare genetic diseases."

Merger Agreement with NeuBase

On January 3, 2019, Ohr announced entering into a definitive merger agreement with NeuBase under which the stockholders of NeuBase would become the majority holders of the combined company. The proposed merger will create a public company focused on advancing NeuBase's peptide-nucleic acid (PNA) antisense oligonucleotide (PATrOL™) technology platform for the development of therapies to address severe and currently untreatable diseases caused by genetic mutations. The proposed merger has been approved by the board of directors of both companies.

On a pro forma basis and based upon the number of shares of Ohr common stock to be issued in the merger, current Ohr stockholders will own approximately 20% of the combined company and NeuBase stockholders will own approximately 80% of the combined company, after accounting for the additional NeuBase financing transaction. The actual allocation will be subject to adjustment based on Ohr's and NeuBase's cash balance at the time of closing and the amount of the additional financing consummated by NeuBase at or before the closing of the proposed merger. Certain members and affiliates of the board of directors and management of Ohr and NeuBase have indicated an intent to invest in the additional NeuBase financing.

The proposed merger is subject to the approval of Ohr's stockholders and the satisfaction or waiver of other customary conditions.

NeuBase intends to use its platform to address repeat expansion disorders, with an initial focus on Huntington's Disease and Myotonic Dystrophy, as well as other dominant genetic disorders.
